

A Parallel genetic design

Proposed engineered EcN architecture

B Ecology & release

EcN and a resident population

$$j = J/J_{\text{ref}} \cdot \text{absolute scale uncalibrated}$$

D Binding reference

Independent, well-mixed buffer model

Human leukocyte elastase

Published rates · pH 8.0 · 25 °C

Calibration
required

model units $\rightarrow$ absolute nM

C Spatial transport

Diffusion, loss and boundary exchange

Extracellular space
